Exercise 8

Membuat mp3 di python

1. Tuliskan code dibawah menggunakan Jupyter Notebook atau Google Colab kemudian simpan file dengan nama MyCode.py. Disini saya menggunakan Jupyter Notebook
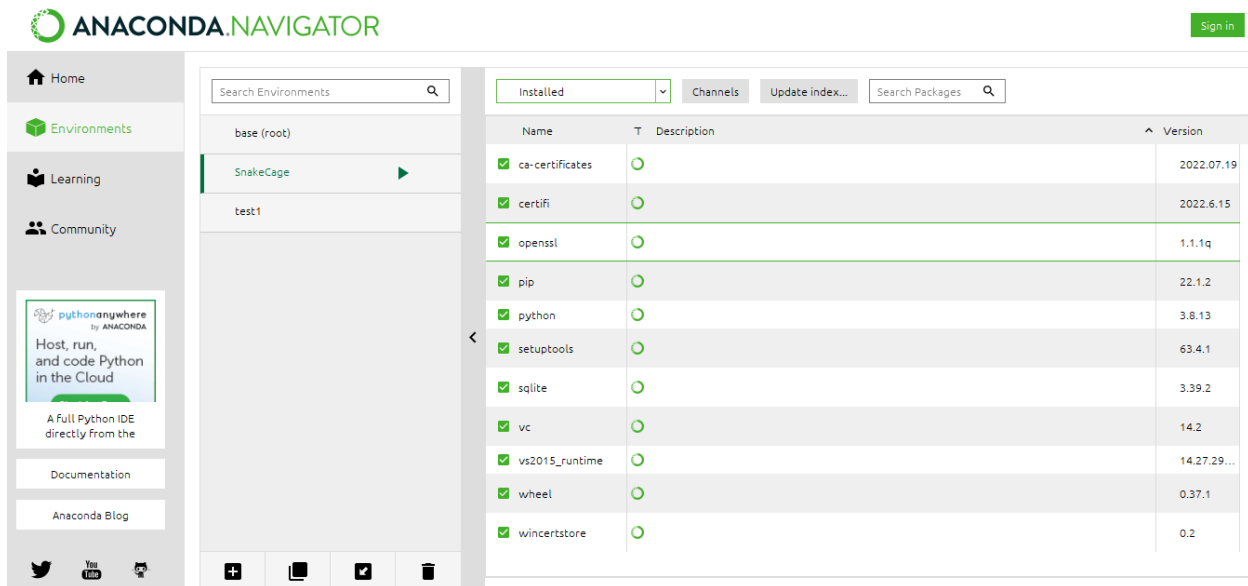

```
In [1]: import os
        from gtts import gTTS
        from audioplayer import AudioPlayer

In [2]: congrats = 'selamat, anda telah berhasil mengelola sebuah environtment'
        language = 'id'
        file_name = 'congratulation.mp3'

In [4]: tts = gTTS(text=congrats, lang=language)
        tts.save(file_name)
        AudioPlayer(file_name).play(block=True)
        print(congrats)

        selamat, anda telah berhasil mengelola sebuah environtment
```

2. Buat environment baru dengan nama SnakeCage menggunakan anaconda navigator

3. Install gtts dan audioplayer

```
(SnakeCage) C:\Users\LENOVO>pip install gtts
Collecting gtts
  Using cached gTTS-2.2.4-py3-none-any.whl (26 kB)
